PROJECTS

Online Voting System App
North Western University

- An online voting system is a software platform that allows groups to securely conduct votes and elections.

Heart Disease Prediction Using Machine Learning
North Western University

📅 3 Months

This project predicts the presence of heart disease using machine learning models, including Support Vector Machines (SVM) and K-Nearest Neighbors (KNN). It analyzes patient health indicators like age, cholesterol, and heart rate, with preprocessing to ensure accurate results. Visualizations and evaluation metrics such as accuracy and ROC-AUC highlight the models' effectiveness, supporting early diagnosis and better decision-making in healthcare.

Hotel Management System
North Western University

- The Hotel Management System automates booking, check-in/check-out,and billing processes, improving overall efficiency.

MY LIFE PHILOSOPHY

"It's not how well you play that matters, it's when you stop."

MOST PROUD OF

🏆 **International Collegiate Programming Contest(ICPC)**
Attended ICPC for two times and solved some problems

💗 **Game Making**
Made a 2D Snake Game using Java

💗 **NWU Programming Contest - 2022**
Participated in the Intra CSE Department Programming Contest and got a better rank
